

## OIL SPILL DISPERSANT

### **SLICKCOUNTER 2020**

**HIGH EFFICIENCY CONCENTRATE**

**OIL SPILL**

**DISPERSANT**

SLICKCOUNTER 2020 is an approved solvent based type 3 concentrate dispersant. Highly effective on a wide range of oils and those with high wax content. To be used as type 2, dilute 1 part dispersant to 10 parts of sea water.

SLICKCOUNTER 2020 is very low in toxicity to marine organisms. It is comparatively more effective than most dispersants at emulsifying crude oils, fuel oils and water –in –oil emulsions (chocolate mousses) even at low temperatures. Resultant oil droplets are minute enough to be retained beneath the sea surface where they are rapidly diluted by subsurface mixing and biodegraded by marine micro organisms.
